THE BRIDGE

Linking Practitioners of German Biological Medicine

Volume 12, Issue #8, August 2016

Wednesday, 17 August 2016

Dear Colleagues, Friends and Supporters of OIRF,

👉 Welcome to Volume 12, Issue #8 of "The Bridge" newsletter!

We often find the summer months to be quiet as many of you enjoy your summer vacations and time with family. This year however has been particularly busy and I find that this Issue of "The Bridge" is literally overflowing. Here, as promised, is the article from OIRF Medical Director, **Theodore J. Cole, DO** called "*The Use of PEMF in the Treatment of Weather Sensitivity*". This is detailed practical application information regarding the research of **Wolfgang Ludwig, DSc** and the pulsed electromagnetic field therapy devices developed by **Advanced Medical Systems**. Thanks to Ted for an excellent article!

Next month we will be featuring an article from our newest OIRF Medical Advisor, **Daniel Beilin, OMD, PhD, LAc** with an introduction and background to regulation thermography. Dr. Beilin was instrumental in the design, development and registration (with the FDA) of the **AlfaThermodiagnostic** devices.

Already translated and ready for publication is an article by **Jens Tesmer, DSc** called "*BioResonance according to Dr. Cornelissen in the Diagnostics of Dementia*". With all the recent seminars, webinars and publications regarding the ongoing and growing crisis of dementia in the aging, this article is ground breaking and timely. Nevertheless this current issue is full to overflowing and we will not likely be able to publish it in "The Bridge" until October's Issue #10.

👉 You've peaked at it, you've read about it and you've seen the full information on the **UBS 315** device from **Medical Electronics** (Mr. **Dieter Jossner** of BioPhoton Therapy fame!). This small piece of innovative technology will revitalize regular water. It's not a filter, but the change in the quality of the water is immediately apparent. We saw this device demonstrated during our 2015 tour program. Mr. Jossner did darkfield on two of our participants, got them to drink some of the revitalized water, and then about 20 minutes later did another darkfield. This was

not just interesting – it was incredibly impressive. So, here's the link to the recently published information about the [Ultra-compact Bioenergetic Stimulator UBS 315](#). Order today for quick delivery – get yours on your desk today!

➤ Note: At this time, OIRF has added one further conference to our busy 2016 fall and winter schedule. The **ACIM Cancer Conference in Orlando, Florida, Sept. 22-25, 2016** will feature lectures from two of our OIRF Medical Advisors (**Dr. Simon Yu** and **Dr. Dan Beilin**) among many other respected physicians and researchers. OIRF will have an exhibit area at this conference and we look forward to seeing and meeting you there. See further details under the “Conferences and Conventions” segment of this newsletter.

➤ Before I launched into my usual comments about the forthcoming **43rd Biological Medicine Tour to Germany** I went back and took another a look at the current registrations and arrangements. All of the speakers are confirmed, the schedule is set, the hotel reservations are made and the private motor coach will be waiting to pick us up in Frankfurt on the morning of 27 October 2016.

Very exciting indeed! But I have run across some interesting and noteworthy trends that very positively influence this tour program. As I've been mentioning (over and over and over again!) this is the **50th Anniversary** of the famous **Baden-Baden Medicine Week Congress**. There are planned celebrations, a more than usual number of exhibitors, an extensive schedule of (German) speakers, many English language lectures and an anticipated record number of attendees. What this means for us and our tour program is like a double edged sword. While there are so many activities and events in which we can share, it has been challenging to work in our own private, exclusive lectures and speakers. While we have our set hotel reservations, in light of the high Med-Week attendance, virtually all of the hotels are booked to the rafters and cannot be as cooperative as usual in regard to last minute reservation changes.

And so on. As a result it is my duty as your “esteemed tour guide, organizer, teacher & bill-payer” to make some changes, so *Aufmerksamkeit!* (= listen up folks):

- In looking over our advance registrations, I find that we have a very select and elite group of practitioners joining us for this exclusive tour program. Many are names well known to you as Director/Advisors to OIRF and also as lecturers and teachers with other organizations. Several of them are who we term “many timers” on these tours and who seem quite content to let OIRF take care of the arrangements and details while they relax, learn and enjoy their stress free time in Germany. On past tours I've found these folks more than willing to engage in conversations and offer suggestions and impressions to the “first timers”, and many are the conversations and “debates” during meals and after-dinner social times. I'm looking forward to a particularly professional and practitioner oriented tour program for 2016. This is a tour program not to be missed!
- Because of the heavily booked hotel situation right in Baden-Baden and the larger surrounding area, we have been limited in the number of room reservations that we are allowed as a group. With the type of high quality family-run hotels that we use for our groups, they are not able to offer us unlimited rooms nor to make last minute addition/deletions if our tour group numbers change.

Thus, when we normally do not limit registrations for these tour programs, this year it has become mandatory so that we can make sure you have a place to leave your suitcase and rest your head on a pillow at night.

For 2016 and our 43rd Germany Tour Program, we have limited our total registration to 22 practitioners. Although we can still squeeze in a few spouses or partners for those of you willing to share a sleeping room, this participation limit is now final. This way we can ensure you enjoy an individualized and highly educational experience.

To date we have received paid registrations taking us over the half-full mark and have an extensive waiting list of other interested practitioners. If you are planning to participate in this tour program, I strongly urge you to get onto the waiting list – or better yet, send in your deposit – as soon as possible as we will likely close registrations long before the deadline date of 26 September 2016.

- Due to the registration limit, we are considering opening some of our exclusive lectures to non-registered practitioners. This would apply to the full day of lectures on Friday, 28 October as well as the Keynote Speaker (**Prof. Dr. Hendrik Treugut**) on Tuesday morning, 01 November 2016. Contact OIRF offices for advance registration and fees.

This **43rd Biological Medicine Tour to Germany** will run from **Wednesday, October 26 through Tuesday, November 1, 2016**, and these important dates coordinate with the new format of the **50th Anniversary Medicine Week Congress**.

The major arrangements for the program have been finalized and the speakers confirmed. Based on our tour program theme of *“Experience and Science: Diagnosis and Treatment Possibilities with High Practical Relevance”*, we are looking forward to hearing the latest information and research in our field especially as it affects application of our well known and recognized therapies including MORA® BioResonance, BioPhoton Therapy, Ionized Oxygen Therapy, Pulsed Electromagnetic Field Therapy and so many more. There is always ample time for questions and hands-on, and this is an excellent opportunity to talk with like-minded colleagues and learn from the experience and expertise of attending OIRF Directors and Advisors.

At this point I don't think I need to rerun all those 10 Top Ten reasons past you again. Follow this link to see all the literature, details and registration information for this [Germany Tour Program](#). You can also see a short version of the details on Page 20 of this Issue of “The Bridge”. The whole concept at this point in time is register now – don't wait until fall when we get close to the deadline. The tour is filling quickly and we don't want to have to deny your participation for simply waiting too long! Contact OIRF offices at 1-800-663-8342 **today** to reserve your place in this program and don't miss this opportunity!

➤ **Special Mention:**

➤ **The Townsend Letter, Issue #396, July 2016**

This is an excellent – definitely not-to-be-missed – Issue of this Newsletter/Journal. Important articles and editorials to note:

- The Zika Pregnancy Nightmare, by Jonathan Collin
- Pathways to Healing, Death is a Process, by Elaine Zablocki
- The State of our Wombs, 'Tox-Sick': From Toxic to Not Sick, by Suzanne Somers
- Clinical Insights from the Sophia Health Institute, By Dietrich Klinghardt and Christine Schaffner
- Voodoo Science: The Myth of Vaccine Efficacy, by Gary Null

The last mentioned article by Dr. Null is of critical importance to every practice and practitioner. Much of the information and statistics shown by Dr. Null mirror and reflect the research and information presented to us by **Dr. Juliane Sacher** during Tour #41 in November 2014. Extensive research in Europe by Dr. Sacher and several others is rapidly becoming irrefutable. CLW

➤ **Focus on MORA[®], Focus on Health! April 2016**

➤ **MORA[®] im Fokus, Gesundheit auf den Punkt gebracht. Juli 2016 (German Version)**

[Hier geht es zum Download](#)

➤ **Dr. Simon Yu's Acupuncture Meridian Assessment Training** workshop in St. Louis Missouri. This workshop is very well presented and all participants leave being able to do basic EAV-type testing. All participants are given detailed information on application of Dr. Yu's testing, diagnostic and therapy procedures with a huge handout binder of information as well as ample hands-on testing training. Other lectures and training are given by **Dr. Doug Cook**, **Dr. Robert Cass** (Physica and A-IBS), **Gordon Johnston** (Kindling) and **Carolyn Winsor** (OIRF and Med-Tronik).

Although restricted to MD and DDS (requires prescribing privileges), this boot-camp workshop will be held in St. Louis, Missouri on August 26-28, 2016. Plan now to attend this excellent workshop.

Follow this link to [Prevention and Healing](#) for further details and registration information about Dr. Simon Yu's **Acupuncture Meridian Assessment Training** workshops.

WEBINARS FROM MED-TRONIK!

Every two (2) weeks, Med-Tronik will be conducting a webinar on various subjects with application and function of the MORA[®] Nova. Each webinar will be approximately 30 minutes in length and will be in both German and English.

Click here for the German webinars: <http://www.med-tronik.de/academy/webinare.html>

And here for the English webinars: <http://www.med-tronik.de/en/academy/webinars.html>

Simply press the Register button and sign up. You will be sent a confirmation email, as well as a reminder closer to the date.

This is a terrific opportunity for you to receive ongoing education featuring some of the best and most famous instructors from Med-Tronik including **Dr. Nuno Ruivo**, **Dr. Peter Mahr** and even occasionally **Dr. Gottfried Cornelissen**. If the times don't work for you, don't worry, Med-Tronik will be archiving them so you can watch at your own convenience (or time zone).

Depending on time available, there may even be time at the end for a brief Q & A.

We look forward to you taking advantage of this terrific opportunity to get training on a regular basis. More topics will be available as time permits.

Be sure to save this to your "favorites" and join in regularly.

➡ I invite all of you to maintain your email or print subscription to "The Bridge" newsletter. All 2016 issues of "The Bridge" will be sent to you by email and then published on our website. **Access is open to all**. Follow this link to get your PDF print copy of "The Bridge" Volume 12, Issue #8.

Further new and cutting edge articles from our prestigious Board of Advisors and Directors as well as more of Carolyn's translations of articles from current German journals are underway for future Volume #12 issues of this newsletter.

➡ Here are your newsletter items for this Issue #8 . . .

- **Meet Your Keynote Speaker for Tour #43:**

Prof. Hendrik Treugut, MD is founder and president of the prestigious "*German Society for Energy and Information Medicine*". He is also head of the Radiological Department of the *Klinikum Schwäbisch Gmünd*. His specialties include the latest complementary medicine diagnostic procedures and medical frontiers. He is responsible for development and realization of an EU-master course of studies including energy medicine. He will tell us about his latest research in these areas.

The Use of PEMF in the Treatment of Weather Sensitivity

By Theodore J. Cole, DO, NMD
(OIRF Medical Advisor)

© Copyright 2016, Dr. Ted Cole, Cincinnati, Ohio, USA

Wolfgang Ludwig, DSc is a name that is familiar to the world due to his research on **pulsed electromagnetic field (PEMF)** therapy. Today, his work is carried on by **Advanced Medical Systems**, and I consider their equipment to be the best of its type in the world. These units are in almost constant use in my practice on a daily basis, and this article will go over one of the common applications.

It seems that there has been an increase in those patients with sensitivity to weather changes. Whether this is due to an actual increase or to the nature of my practice is unknown to me. The standard medical community has the position that the link between symptoms and weather changes is hypothetical and that the research has come to mixed conclusions.

However, several studies have shown that atmospheric conditions can affect well-being or disease, and that some individuals seem to be more sensitive to weather than others. Since epidemiological data on the prevalence of weather-related health effects are sparse, this study looked at two representative weather sensitivity (WS) surveys that were conducted independently in Germany and Canada.

In Germany 1,064 citizens (age >16 years) were interviewed in January 2001, and in Canada 1,506 persons (age >18 years) were interviewed in January 1994. The results showed that 19.2% of the German population thought that weather affected their health “to a strong degree,” 35.3% that weather had “some influence on their health” (sum of both = 54.5% weather sensitive), whereas the remaining 45.5% did not consider that weather had an effect on their health status.

In Canada 61% of the respondents considered themselves to be sensitive to the weather. The highest prevalence of WS (high + some influence) in Germans was found in the age group older than 60 years (68%), which was almost identical in the Canadian population

(69%). The highest frequencies of weather-related symptoms were reported in Germany for stormy weather (30%) and when it became colder (29%). In Canada mainly cold weather (46%), dampness (21%) and rain (20%) were considered to affect health more than other weather types.

The most frequent symptoms reported in Germany were headache/migraine (61%), lethargy (47%), sleep disturbances (46%), fatigue (42%), joint pain (40%), irritation (31%), depression (27%), vertigo (26%), concentration problems (26%) and scar pain (23%). Canadian weather-sensitive persons reported colds (29%), psychological effects (28%) and painful joints, muscles or arthritis (10%). In Germany 32% of the weather-sensitive subjects reported themselves to be unable to do their regular work because of weather-related symptoms at least once in the previous year, and 22% of them several times. Co-morbidity was significantly higher in weather-sensitive subjects both in Germany and Canada. (1)

If these statistics are correct, then it certainly appears that weather sensitivity is a pretty common problem. The critics point out that this is just a survey and doesn't prove that these people are actually sensitive to weather changes. The following studies will answer that issue.

The first study examined the impact of weather on rheumatoid arthritis patients. The results showed that for all patients the pain levels were highest on cold, overcast days and following days with high barometric pressure. Pain levels also increased as a function of change in relative humidity from one day to the next. Results also revealed that there was significant variability between patients in their weather sensitivity patterns. In general, patients with higher levels of self-reported pain demonstrated more weather sensitivity. (2)

Still another study looked at patients with chronic pain of all types. Chronic pain patients frequently report that weather conditions affect their pain, but there have been no standardized measures of weather sensitivity. The authors developed the Weather and Pain Questionnaire (WPQ) which assesses patient sensitivity to weather variations. Seventy chronic pain patients (59% females) with an average age of 43 years completed the WPQ. The instrument was revised using factor analysis to produce a Weather Sensitivity Index (WSI) (48% of variance) with high internal consistency (0.93) and test-retest reliability ($r = 0.89$).

The results indicated that patients could reliably identify which meteorological variables influenced their pain but could not reliably determine which physical symptoms were consistently affected. The most frequently reported factors which affect pain complaint were temperature (87%) and humidity (77%). The most frequently reported physical complaints associated with the weather were joint and muscle aches (82% and 79%, respectively).

Patients labeled as being 'weather sensitive', defined by greater than median scores on the WPQ, reported significantly greater pain intensity, greater chronicity of pain problems, and more difficulties sleeping than patients with low scores on the WPQ. No differences in gender, education level, disability status, or global psychological distress were found. (3)

This next study looked at the effect of weather on migraines. The scientific evidence for weather being a trigger factor for migraine attacks is considered to be inconclusive. Therefore, headache diaries of 20 patients with migraines were analyzed and correlated in 4 hour intervals to atmospheric air pressure, temperature, and relative air humidity in Berlin (Germany) for a period of 12 consecutive months. Migraine attacks started most frequently at 4 a.m. and reached the highest intensity between 4 and 8 a.m. A highly significant association between meteorological variables and the occurrence of migraine attacks was found in six patients. The onset of an attack as well as high headache intensity was associated with lower temperature and higher humidity. This data revealed that a subgroup of their patients were highly sensitive to changes in the weather. (4)

Another study also looked at the association of migraine with weather. The sample consisted of 77 migraine patients seen in a headache clinic who provided headache calendars for a period ranging from 2 to 24 months. Each patient was given a questionnaire assessing their beliefs about how strongly (if any) weather affected their headaches. Second, weather data were collected from the National Weather Service, from three reporting stations central to the residences of the study participants. Analysis was performed on 43 variables to generate three meteorological factors. Factor 1 represents a function of absolute temperature and humidity. Factor 2 represents a changing weather pattern. Factor 3 represents barometric pressure.

Of the 77 subjects in the study, 39 (50.6%), were found to be sensitive to weather, but 48 (62.3%) thought they were sensitive to weather conditions ($P < 0.05$). Thirty (38.9%) were sensitive to one weather factor and 9 (11.7%) to two factors. Twenty-six (33.7%) were sensitive to factor 1; 11 (14.3%) to factor 2; 10 (12.9%) to factor 3.

This study clearly shows the influence of weather on headache, and that many patients are susceptible to multiple weather factors. (5)

The following study is one of few that also looked at the effect of winds. Changing weather fronts produce severe changes of daily rhythms. Electrical impulses arrive 1-2 days before the weather and create either atmospheric or "positive ions". They appear to be responsible for the epidemic appearance of migraine and of thromboembolism.

The impact of atmospheric electricity was assessed in 1000 patients by daily urinalysis of serotonin, 5-HIAA, adrenaline, noradrenaline, histamine, thyroxine, 17-KS, 17-OH, Na,

K, creatinine and diuresis. The changes found in these 12 parameters allowed a classification of heat reactions into three clinical entities: 1. serotonin hyperproduction causing a typical irritation syndrome; 2. adrenal deficiency producing a typical exhaustion syndrome; 3. hyperthyroidism "Forme fruste" with subclinical "apathetic" thyroid symptoms.

These symptoms, typical for Föhn, Tramontana, Sirocco, Sharkiye, Chamssin, Sharav and Santa Ana Winds, are mainly due to positive ionization of the air. They can be prevented by negative ionizing apparatuses or specific drug treatment. (6)

Several studies have examined the effect of weather on mood. In this research, it was found that the risk of committing suicide was significantly higher on days with high temperatures, low relative humidity or a thunderstorm and on days following a thunderstorm. The multiple logistic regression analysis left "temperature" and "thunderstorm on the preceding day" as significant factors, even after adjustment for sociodemographic and geographical variables. (7)

The conclusions of several studies show little agreement concerning the relationship between weather and the incidence of stroke. This study analyzed the relationship between daily meteorological conditions and daily as well as seasonal stroke incidence.

The researchers looked at 1,286 consecutive strokes assessed during 3 years (2001-2003) from the reference area of Hospital del Mar that were classified as intracerebral hemorrhage (ICH) (n = 243) or ischemic stroke (IS) (n = 1,043). IS was divided in non-lacunar stroke (NLS) (n = 732) and lacunar stroke (LS) (n = 311).

Daily meteorological data were obtained concerning atmospheric pressure (AP), relative humidity, maximum, minimum, and mean temperatures, and the variation of all these measures compared with the previous day.

Total stroke (TS) incidence showed little association with AP, but was higher with the AP variations. NLS were related to AP falls while ICHs were associated with AP rises. NLS and temperature showed an inverse correlation; however, it lost its significance after adjusting for AP variations. The daily incidences of NLS and ICH were higher in autumn and in winter, but depended strongly on the daily variations of AP.

Based on these results, the incidences of NLS and ICH are related to AP changes compared with the previous day. AP changes largely explain the seasonal and daily variations in the incidence of stroke. Since this was not a variable tested in many studies, it could explain the difference in results. (8)

This next study also looked at weather and stroke. A large clinical stroke registry with the UK Met Office database was used to assess the association between meteorological variables and specific clinical subtypes of acute stroke.

Data from 6389 patients with acute stroke were examined. The mean age (SD) was 71.2 (13.0) years. About 5723 (90%) patients suffered ischemic stroke of which 1943 (34%) were lacunar. Six hundred and sixty-six patients (10%) had hemorrhagic stroke.

Every 1 degrees C increase in mean temperature during the preceding 24 h was associated with a 2.1% increase in ischemic stroke admissions ($P = 0.004$). A fall in atmospheric pressure over the preceding 48 h was associated with increased rate of hemorrhagic stroke admissions ($P = 0.045$). Higher maximum daily temperature gave a greater increase in lacunar stroke admissions than in other ischemic strokes ($P = 0.035$).

As in the previous study cited, this research also demonstrated a measurable effect of atmospheric conditions upon stroke incidence. (9)

The question in this following study was: Can good or bad mood induced by the weather influence people's ability to correctly remember everyday scenes? In this field study, it was found that weather-induced negative mood improved memory accuracy. Randomly selected shoppers on bright, sunny days (good mood) or on cloudy, rainy days (bad mood) saw 10 unusual objects in the check-out area of a suburban shop, and their recall and recognition memory for these objects was later tested. Shoppers in a negative mood showed better memory and higher discrimination ability. (10)

The next article studied 4797 cases of patients who were cured of their psychological symptoms and their notes filed by the psychiatric clinic of the Eginition Hospital in Athens, during the year 1994. The results of this analysis imply significant contribution of environmental variations, expressed by a discomfort index, in the aggravation of psychological symptoms like depression, sleep disturbances, anxiety, aggressiveness, etc. Moreover, geomagnetic field variations expressed by the international geomagnetic index (DST) manifest significant indications that they contribute to the aggravation of sleep disturbances. A clear seasonal variation, with a maximum around August and a minimum at the end of the year, appears in the environmental index, while a double oscillation with a period of about six months is obvious in the geomagnetic index. The same more or less seasonal variation was mirrored in most of the psychological symptoms that were analyzed in this study. (11)

As the above literature demonstrates, there is a clear relationship of weather to multiple areas of health. Some people are much more sensitive to these factors than others, and there is variation in the nature of the symptoms experienced and the types of weather changes associated with them. However, I could find no studies that offered any kind of

treatment from the perspective of standard medical approaches. I assume that this is at least partly due to the fact the standard medicine considers this area to be “hypothetical”, and therefore not worthy of attention. Only the article above suggesting the use of negative ions (6) (with a vague reference to drug therapy), and one that was in German (12) offered any type of therapy at all. And as I don’t read German, I’m not sure what the suggestions were!

However, my experience has been that there is a very effective therapy for weather sensitivity: PEMF. The Medisend units manufactured by AMS contain a program designed to treat weather sensitivity, which has obtained excellent results overall. The following case reports will give just a few examples of therapeutic results obtained in this condition.

One woman had migraines so severely that they were incapacitating. This occurred any time a new weather front would move through the area. With the first treatment, her headache was gone before the treatment was completed. Subsequent treatments have greatly reduced the severity of the migraines over time, and any migraine present during therapy has resolved completely. This has made a tremendous improvement in her quality of life.

Another patient had severe joint pain with weather changes. They had a similar response, with joint pain clearing with treatment, and subsequent reduction in both severity and frequency of symptoms over time with repeated treatments.

A third patient with fibromyalgia, fatigue and joint pain aggravated by weather changes had a 50% reduction in symptoms with the first treatment, and continued improvement with subsequent therapy. She was able to greatly reduce pain medication, and her reactions to weather changes are now mild and very manageable.

Given these clinical results, it is surprising that there is no research found on this therapy in the medical literature, given the number of adverse effects that weather sensitivity can cause. In light of the fact that there is no real medical option for treatment, this would seem to be the only viable candidate for investigation at this time and an area ripe for research. In the meantime, we have access to a therapy that is effective and safe for our patients and can help resolve a source of multiple adverse symptoms.

Pandemrix Vaccinations

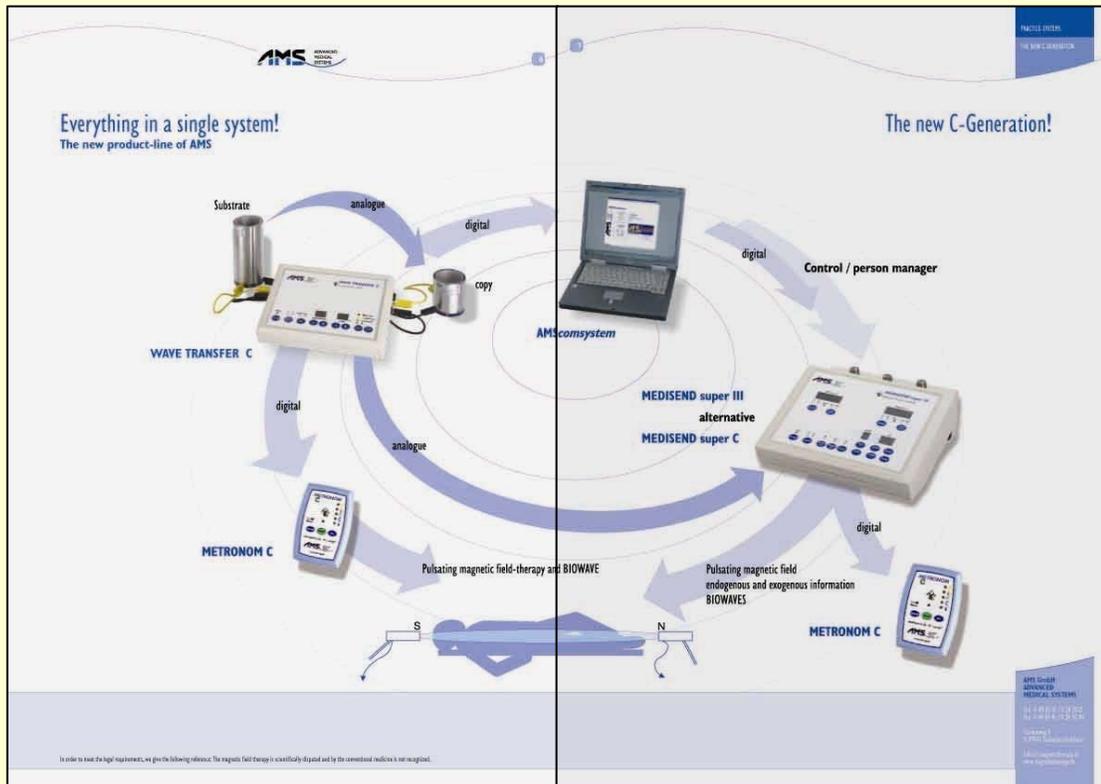

In future those affected persons in Sweden who suffer from incurable narcolepsy as a consequence of the swine flu vaccination with the vaccine Pandemrix, can claim a maximum up to 10 million Swedish Krona (one million Euro) in compensation. A corresponding law was recently initiated by the Parliament in Stockholm. Altogether in Sweden 475 patients claimed compensation, of which 311 cases were granted. Leading symptoms of the narcolepsy are persistent daytime drowsiness, imperative sleep attacks and cataplexy, sudden tone loss of the supporting musculature which is triggered by sudden strong feelings. Pandemrix was permitted in September 2009 in the European Union for the prevention of an infection with the virus strain H1N1/v. During the influenza wave of 2009/2010 nearly 31 million persons were vaccinated with it, and there were also vaccines from other conglomerates. In Sweden 60 percent could be vaccinated. In Germany according to the Paul-Ehrlich Institute up to 81 suspicious cases were recorded. A portion of those patients also demand compensation.

Practice Application:

**ADVANCED MEDICAL SYSTEMS –
Everything in a single system!
Pulsed Electro-Magnetic Field Therapy**

Medisend Super C: Pulsating magnetic field, regulative medicine, “bio-resonance”, acupuncture, transmission and storage of oscillations.

Medisend Super III: The “luxury liner” model includes everything mentioned above plus many added features including “bio-resonance” and bipolar magnetic output with the use of two directional inductors.

Wave Transfer C: For the transmission and duplication of bio-information in either analog or digital format.

Metronom C: Pocket sized magnetic field device with five programs. Can be “loaded” with bio-information. Ideal for complementary home use.

AMScomsystem: Communication and control platform for the new C-generation of devices – now you can steer “everything in a single system” with this new software. Can be used with all devices designated with the “C”

These devices are all based on the work of **Dr. rer. nat. Wolfgang Ludwig**. Please see the graphic above for a pictorial representation of this phenomenal system.

You can contact **Advanced Medical Systems** directly for full order, pricing and delivery information on their website at:

www.magnetotherapy.de/

Mention OIRF with your order to receive a small discount (±3%).

MORA[®] NOVA

Vibrations that will change your life!

The MORA[®] BioResonance Method with reliable 2-channel technology

Stimulates self-healing powers and
thus removes disturbances and blockages.

Target group: Physicians, alternative practitioners,
therapists and naturopaths.

TREATMENT

For diagnosis or therapy with MORA[®] NOVA, the patient is connected through hand, foot and head electrodes. The patient's vibrations are sent to the device through the electrodes. Depending on the symptoms and treatment program, the vibrations are converted by MORA[®] NOVA into corresponding therapy frequency patterns and returned to the patient through the output electrodes.

BENEFITS FOR USERS

Today the bio-resonance therapy as an energetic diagnosis and therapy method cannot be wished away from holistic complementary medicine. MORA[®] NOVA offers many options that can cover various therapy fields. It gives you a reliable diagnosis and therapy. The body is thereby supported to regulate itself. Your patients experience a side effect-free therapy, which achieves astounding results for many symptoms and diseases. Often the bio-resonance therapy is helpful in cases where traditional medicine was not adequate.

BENEFITS FOR PATIENTS

- ◆ Often the patient feels an improvement just after the first treatment
- ◆ Therapy is often perceived as very comfortable
- ◆ Treatment is free of side effects and is not at all stressful
- ◆ Short treatment duration (between 5 and 30 minutes)

The MORA[®] System offers many remarkable possibilities!

MORA[®]-Diagnostics

The MORA[®]-Diagnosis and MORA[®]-Therapy are state of the art medical technology. They use the latest insight of modern biophysics and are scientifically researched and verifiable. The MORA[®] device has many diagnostic and therapeutic options.

MORA[®]-Therapy

For 35+ years, the MORA[®] bio-resonance therapy has been used successfully around the world. This therapy form makes it possible not only to diagnose unhealthy oscillations but also to treat them.

The electromagnetic oscillations are

- ◆ picked up in the patient's body
- ◆ transmitted to the MORA[®] device
- ◆ inverted by means of electronic amplifiers, and
- ◆ returned to the body

The aim:

To activate the body's self-healing power and to remove disruptions and blockages. The patient's balance is to be restored.

Treatment

Experience has shown that patients find the treatment very pleasant. While the electrodes are being put into place, the patient can relax. The therapy lasts between 5 and 30 minutes. Many patients even experience an improvement after the first treatment.

Side Effects

The patients experience a therapy free from side effects. The practice is not stressful at all. It can be used attendant to any pathology and permits combination with many therapeutic methods. In many diseases astonishing results are achieved.

GUARANTEED QUALITY

Outstanding quality and excellent services!

Quality creates trust!

Constant high quality – that is the primary goal. Only then we can satisfy our customers on long-term basis. After all we are dealing with health here. Therefore the continuous improvement of the internal quality management has a very special focus. Due to this reason all MORA[®]-Products are manufactured only in Germany. All the working steps – from development to material selection to precision manufacturing – are tightly monitored and controlled. The high quality requirement is documented through following independent audits and certifications.

4 DVD SET NOW AVAILABLE!

MORA BioResonance Therapeutic Possibilities Getting the BEST out of your MORA Technology

Date: Thursday, September 10, 2015 – COMPLETED! You missed it!

Intended audience: For beginners and advanced MORA® BioResonance users. For whatever model you are using, learn the true BioResonance Therapy applications.

You have the MORA, but how do you get the **best** out of it? This one-day lecture course guides you gently, starting with how to think about the way the MORA works, how to think about your patient's health problems, and how to match the two for optimum treatments.

For beginners, or for those who need a refresher, the basic concepts of classical BioResonance are clarified. Learn how to immediately provide effective treatments even if you don't know what you're doing yet.

As the day progresses, you receive expert guidance on how to tackle the most common underlying problems in health, including candidiasis, influenza, hay fever, food intolerances, "tummy bugs", Lyme disease, dental support, and hormonal issues. You will also learn how to verify that the treatment you've given has already been effective. Cases are presented to provide additional concrete information and summarize the day's information.

Lecture course features **Marguerite Lane, ND** from Australia. She has been in full time private practice since 2002 and has used the MORA Super since 2003. She is specialized in the BioResonance techniques of **Dr. Gottfried Cornelissen** of Germany.

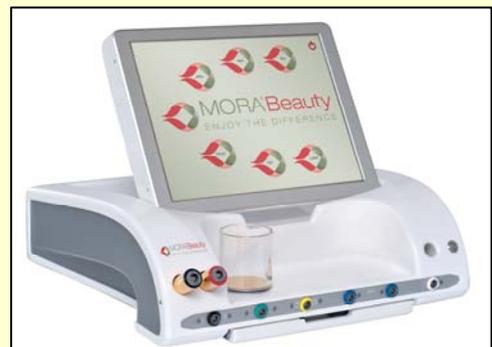

This course was sponsored by **Occidental Institute Research Foundation** and presented in conjunction with the **Gateway Fdn. for Biological & Integrative Medicine** prior to the famous "Curing the Incurables" Conference held in St. Louis, Missouri September 2015.

We encourage you to take advantage of this opportunity to benefit from the therapy application and information presented by this well respected and experienced practitioner. Video was professionally filmed and edited.

Set of 4 DVDs US \$150 plus shipping (available for immediate shipment).

➡ Did you see the Issue #5 Supplement to "The Bridge" newsletter? We included an excellent article that told about the amazing results and effectiveness of this BioResonance device designed for cosmetic applications. Menus and programs are straightforward, and it is intended to be delegable! Follow this link to see the supplementary newsletter article and device details for the remarkable [MORA® Beauty](#).

Videotaped "DIAGNOSTICS" AND "THERAPEUTICS"

Seminar/Workshops by Dr. Walter D. Sturm† of OIRF Staff

* 1944-2004 †

Part One on Diagnostics:

- Electronic point measurement
- Medication testing, and more

Part Two on Therapeutics:

- **MORA-Therapy**
- Electronic Homeopathy
- Remedy Information Transfer, and more
- *Optional day on his other therapies!*

Follow this link to see a full description of these videotaped "[Diagnostics and Therapeutics](#)" Seminar/Workshops by the late Dr. Walter D. Sturm† of the OIRF Staff.

Available on five (5) DVD's plus one (1) CD with all overheads and extensive handouts materials for CDN \$200 (plus shipping).

Published in Canada by: **Occidental Institute Research Foundation**
P. O. Box 100, Penticton, BC V2A 6J9 Canada

Website: www.oirf.com Email: support@oirf.com

Special Reports:

1) Report on LM Potencies. Translated and prepared by *Dr. Walter D. Sturm* based on the work of *Dr. Samuel Hahnemann*. This is pivotal information for all homeopaths. In the last years of his life Dr. Hahnemann turned solely to the use of LM potencies for his patients instead of the "usual" C and X potencies still utilized today. This knowledge was suppressed for nearly 80 years and revolutionized the practice of homeopathy when that famous 6th edition of his *Organon of Medicine* was finally published. Read the story and see the meticulous research and translation left us by Dr. Sturm. See further information on this [important report](#) at this link. 51 Pages. \$40

2) The Problem of A and Inverted A in Homeopathic Nosodes. Translated and prepared by *Dr. Walter D. Sturm* based on the research of *Gottfried Cornelissen, DMD*. Advanced BioResonance information. 4 Pages. \$5

3) A Critical Examination of Current EAV-Diagnosis, the Mebe-Ampule and Filter Procedure. Translated and prepared by *Dr. Walter D. Sturm* based on the research of *Gottfried Cornelissen, DMD*. Digital single oint mwasurement according to Dr. Cornelissen. Advanced BioResonance and EAV-Diagnostic information. 14 Pages. \$10

4) The Genital System. Translated by Carolyn L. Winsor; revised and edited by *Sean Christian Marshall, DSc* based on the work and research of *Jean-Claude Darras, MD*. Advanced traditional acupuncture information explaining the energetics of the genital system including disorders and treatment. 23 Pages. \$25

A New Report

The Ground Regulation System (GRS)

By o. Univ.Prof. Dr.rer.nat. med.habil. Hartmut Heine

A few years after his serious illness in 2011 **Prof. Dr. Hartmut Heine** published a series of seven articles on the **Ground Regulation System**. I [*Carolyn Winsor*] was honored to be able to translate this incredible research into English for the first time and to publish it in our newsletter, "The Bridge".

As I worked my way through translation of the first article, the wealth of knowledge and understanding imparted in even that introductory article left me scrambling for dictionaries, research documents hidden away in the old OIRF library and way beyond "Google searches" to make sure that I was doing justice to the information Prof. Dr. Heine was imparting. Combined with the succeeding six further articles, his gift to us of knowledge and of understanding is truly priceless.

In respect for Prof. Heine I have merged those seven articles into one single report and have republished it separate from that older newsletter. With a total of 48 (mind-blowing) pages, this work is not just "worthwhile" reading, but mandatory reading for all practitioners of orthodox and complementary medicine. Available in electronic or print format for \$30, here is an outline of the contents:

- Part 1** – The Ground Regulation [A History and Background]
- Part 2** – GRS as a non-linear system – Structure, function and determined chaos
- Part 3** – GRS as a non-linear system– Structural components of the extracellular matrix (ECM)
- Part 4** – Spatial structure of the ECM and material transport within the system
- Part 5** – Contact, limitation and clogging up: Cell adhesion, basal membrane and glycosylation
- Part 6** – Functional relations of the ground regulation with the central nervous system
- Part 7** – The Ground Regulation and the Circadian Rhythm
 - The Ground Regulation and Alzheimer Dementia

And don't forget to order your copy of:

The OIRF Special Report On Medication Testing

A translation of Dr. Kramer's full medication testing guidelines from beginning to highly advanced aspects. Dr. Kramer has given us the most complete, step-by-step guidelines for learning medication testing on your own. Based on his seventeen years of practice and teaching, he also suggests the preparations you need to get started. Recommendations on how to order a set of those preparations for yourself are included within the report, and most are now included within the Electronic Remedy Test Sets Software. If you follow all of the report instructions, you will learn how to do medication testing by yourself, easily, quickly and correctly. If not, something is wrong with your Electro-Acupuncture instrument – not you!

This SPECIAL REPORT available in electronic or printed format for \$30.00
(Report is over fifty pages. Preparations are not included.)

➤ **OIRF Resource Materials:**

- For more information and instruction about point and medication testing with EAV see the OIRF: [Medication Testing Report](#) and the [EAV Desk Reference Manuals](#) (both available on disc).
- For more information and instruction about [Diagnostic and Therapeutic Techniques in Biological Medicine](#) with emphasis on BioResonance Therapy be sure to order the recently re-released videos of Dr. Walter Sturm's seminars.
- For a complete [listing of OIRF resource materials](#), including publications, reports, books and videos please follow this link to our website. There are full descriptions of all printed and recorded materials online.
- For a complete [listing of OIRF recommended instrumentation](#), including diagnostic, therapeutic and BioResonance devices please follow this link to our website. There are full descriptions of all instrumentation online.
- Of the three full "home-study" or "extension training" programs developed by Occidental Institute, two have been fully updated and are available in PDF format on disc. Research and publication of each of those programs has been pivotal in the development and application of Acupuncture and Biological Medicine in North America and around the world. Be sure to obtain your copies of these famous and well respected volumes for your library and study purposes.
 - Modern & Traditional Acupuncture: \$165
 - Master of Acupuncture Program: Translations of the ancient acupuncture classics (The Nei Ching consisting of the Su Wen and Ling Shu, as well as the "Difficult Classic" the Nan Ching) are still available in printed format – \$125
 - EAV Desk Reference Manuals, Parts 1 & 2 – \$200
 - Diagnostics and Therapeutics Seminars of Dr. Sturm – \$200

Get more details at <http://www.oirf.com/resources.html>

"EXTENSION TRAINING" PROGRAM IN MODERN & TRADITIONAL ACUPUNCTURE

Over twelve hundred pages of printed materials incorporating applicable materials from the supplementary textbook ([An Outline of Chinese Acupuncture](#)) and set of four charts (by [China Cultural Corp.](#)). Program starts off assuming you know nothing about acupuncture (a good place to start even if only as a thorough review of the basics) and takes you right through to the most heavy-duty advanced aspects of true, 'energetical' acupuncture. The finest and most comprehensive material in the English language, covers all seventy-one meridians of traditional acupuncture; that 'missing sixty percent' of acupuncture knowledge most "acupuncturists" have never even heard of; and, the modern electronic 'needle-less' treatment methods (Electro-Acupoint Therapy) now so popular.

Over 3,000 students were originally enrolled in this famous Extension Training Program, and the OICS graduate listings read like a "Who's Who of Acupuncture" in the English speaking world. This program takes you as far as anyone possibly can in a 'written' format prior to the clinical finesse and practicum needed to round out your acupuncture study to professional levels.

FULL THIRTY-THREE LESSON PROGRAM NOW AVAILABLE ON DVD

Price includes disc with all 33 Lessons, applicable supplementary textbook (An Outline of Chinese Acupuncture) passages and representation of set of acupuncture charts (China Cultural Corporation set of four). [Current editions of the textbook and charts can be easily obtained from suppliers of acupuncture books and supplies.] Price does **not** include printed materials, binders; or, any tutorial, examination, or certification privileges. Follow above link for full details. **Full set on one disc available for CDN \$165.**

Occidental Institute Research Foundation

43rd Biological Medicine Tour to Germany

Wednesday, Oct. 26 through Tuesday, Nov. 1, 2016

Theme: Experience and Science: Diagnosis and Treatment Possibilities with High Practical Relevance

Coordinated and Hosted by: Carolyn L. Winsor,
OIRF Managing Director

Accompanied by OIRF Medical Advisor: Marguerite Lane, ND
Member of OIRF Board of Directors and Board of Advisors

Beautiful Baden-Baden in the Fall!

- Visit and participate in the famous **Baden-Baden Medicine Week Congress**

Here's part of the group gathering outside the Medicine Week Congress House

- Our private lectures present the latest information and research in our field, with ample time for questions and hands-on

Keynote Speaker: *Prof. Dr. Hendrik Treugut*, Pres. DGEIM, Researcher

Plus exclusive English language lectures for OIRF group:

- **Daniel Beilin, OMD LAc** - AlfaThermodiagnostics
- **Silvia Binder, ND PhD** – ONDAMED Therapy
- **Friedrich Douwes, MD** – Integrative Cancer Therapy (Klinik St. Georg)
- **aProf. Ivan Engler, MD PhD** – Inhaled Ionized Oxygen Therapy
- **Dietrich Klinghardt, MD** – Biological & Energy Medicine
- **Nuno Ruivo, DO & Peter Mahr, HP** – MORA BioResonance Therapy

English Programs at Med-Week:

- **Jürgen Nienhaus, MD** – Practitioner and Lecturer (BioResonance)
- **Thomas Rau, MD** – Practitioner and lecturer (Paracelsus, Sanum)
- **Helmut Sauer, MD** – Thermographic Regulation
- **Dr. Anthony Scott-Morley** – Practitioner and Lecturer (BioResonance)
- **Georg Stommel, MD** – Dyckerhoff RNA Therapy

And as many others as we can manage to work in!!

- Presentations from famous German Biological Medicine Clinics
- Presentations by several instrumentation companies on the practical application
- An opportunity to talk with like-minded colleagues and learn from the experience and expertise of attending OIRF Directors and Advisors.
- Be treated like family with good food, good friends and good conversation in friendly hotels
- Travel in comfort with plenty of room for luggage, and stay in a family run hotel located in the vineyards close to Baden-Baden.
- Tour price of \$3,795 includes full tour program, 7 nights single room and all but a few meals.
- **Register early!** Limited available spaces are already filling.

Germany Tour details at:

www.oirf.com/germany2016.html

➤ **Conferences and Conventions:** As an ongoing approach to bring this information and education to a broader range of practitioners, OIRF will sponsor speakers and lecturers in a number of conferences and events throughout the USA, Canada and Germany, and we are looking forward to an exciting and busy fall season.

Plans and registrations for OIRF to be present at a number of important conferences throughout the US, Canada and Germany have been arranged, and we are looking forward to an exciting and busy year. It is our hope that you will join us in our efforts to expand the use and knowledge of Biological Medicine in Canada, the USA and around the English speaking world.

Here are **some** of the events where our OIRF Board of Directors and Advisors are giving presentations and participating. Be sure to check out the announcements of events and conferences enclosed and on the [Calendar of Events](#) on our website. Make plans **today** for which events you will attend during 2016. Your support for the organizers is greatly appreciated, and gives you the return of fascinating, informative and educational programs that will enhance your practice – and CEU's! OIRF directors, advisors and/or members are active in each of the recommended events. See Pages 4, 5, 16 & 17 and 20-22 for further details.

➤ **Acupuncture Meridian Assessment Training** for MD, DO and DDS. Primary focus is teaching medical practitioners how to check a few essential acupuncture points to look for disturbances which might be an indication of parasites or dental problems. This training covers many clinical case histories that will amaze you with the healing results that occur where prior numerous doctors and specialists failed to succeed. Class consists of lectures and lots of hands on "boot camp" drills for 2½ days held in **St. Louis, Missouri on August 26-28, 2016**. Sponsored by **Dr. Simon Yu** and also featuring **Dr. Robert Cass, Dr. Doug Cook, Gordon Johnston** and **Carolyn Winsor**. To register contact Kate, Office Manager at 314-432-7802 or [Prevention and Healing](#)

➤ **Conquering Cancer Conference**, Sept. 22-25, 2016 Orlando, Florida. Coordinated by ACIM Connect in cooperation with **Dr. Joe Mercola**, this conference has a list of 25(!) well known and respected speakers including OIRF Medical Advisors **Dr. Simon Yu** and **Dr. Dan Beilin**. Follow this [Cancer Conference](#) link for full registration and speaker details. OIRF will be available for demonstrations of the new RM10 assessment device as well as the BioResonance Cancer, Mitochondriopathy and Dementia programs of **Dr. Gottfried Cornelissen** available on the **MORA® Nova**.

➤ **50th Anniversary Medicine Week Congress**, Oct. 28 through Nov. 1, 2016 in Baden-Baden, Germany with OIRF Advisors, Directors and Germany Tour participants attending. Usually more than 3,000 doctors participate with nearly 200 lectures, workshops and courses (German and English language). The main theme for 2016 is "*Experience and Science: Diagnosis and Treatment Possibilities with High Practical Relevance*" is mirrored for the OIRF Tour #43. Exhibit area with more than 220 exhibits provides you with an excellent insight into the big product offerings in natural healing and complementary medicine. There you can find out directly, and compare. Contact OIRF for attendance possibilities.

➤ **Biological Medicine Tour #43 to Germany, October 26 through November 1, 2016.** Join us for our **43rd** group tour including the world famous “Medicine Week” Congress in Baden-Baden. Tour program also includes exclusive OIRF English language lectures from renowned German clinicians and researchers as well as pharmacy and clinic visits. Speaker, event and activity schedules have been posted on our website at: www.oirf.com/germany2016.html . Registration for this program is now open and attendance for the program will be strictly limited. We strongly recommend early registration. Meet us in Frankfurt to participate in this exciting and exclusive program.

➤ As US certifications for the MORA Beauty are finalized, OIRF and Med-Tronik will be sponsoring exhibit areas at a number of conferences throughout the USA and Canada during 2016. Watch for dates and locations to be announced for an opportunity to see this remarkably effective device that can rapidly generate income for your practice.

- See the **MORA Beauty** at **A4M Las Vegas, Nevada on Dec. 9-11, 2016**, Booth 5084
- More dates to follow . . .

➤ **MORA BioResonance Therapeutic Possibilities**, 1 day course on therapeutic applications with **Marguerite Lane, ND**, Australia. 4 DVD set of video recordings are now available through OIRF for US \$150 plus shipping. [Note: All backorders will ship during the first week of March.]

➡ Follow this link to our website to see Issue #8 in print/PDF format.

➡ **Updates, Reminders and Announcements:**

➤ Again! Register now for the **43rd OIRF Biological Medicine Group tour to Germany for 2016**. This 43rd Germany Tour will take place in conjunction with the **50th Anniversary Medicine Week Congress in Baden-Baden** in Oct/Nov of 2016! Confirmed tour dates are set for Oct. 26 to Nov. 1, 2016.

➤ Watch for Volume 12, Issue #9 of the “The Bridge” newsletter to arrive in your Inbox around mid-September 2016. Additionally, there are a number of new and exceptionally well written articles by Med-Tronik researchers and instructors that have been published in the German CO’Med journal. Carolyn is busily translating as many of them as possible for future newsletter issues. The September issue will feature an article by OIRF Medical Advisor, **Dr. Dan Beilin**.

- Visit our **Facebook** page – will you be our friend?

I trust you have found much of interest in these pages. All of our many 2016 events and activities have been fully arranged and finalized, and we are looking forward to participating in numerous conferences while supporting the various speakers and complementary organizations. Additionally there are variety informational articles being prepared for the next Issues of Volume 12 of "The Bridge". Electronic publication with access open to all will continue throughout 2016 and we will continue bringing you that cutting edge information for which OIRF is famous.

We look forward to meeting you during our forthcoming 2016 activities and programs. As always your comments are welcome. Remember that this is your newsletter. Your suggestions, article contributions, critiques, FAQ's and compliments are gratefully accepted.

Yours in health,

Carolyn
