THE BRIDGE

Linking Practitioners of German Biological Medicine

Volume 10, Issue #1, January 2014

Tuesday, 14 January 2014

Dear Colleagues and Friends of OIRF,

👉 **Welcome to the Volume 10, Issue #1 of "The Bridge" newsletter for 2014!** As we assess 2013 and get set to begin a new year, I trust that you are filled with optimism and plans that will take your practice to the next level of success. It has certainly been an interesting year here at Occidental Institute and I am thrilled to be working with practitioners and researchers who have endeavored to present us with the latest and most in depth information.

You have read many times before that the only constant is change. The same holds true for OIRF. How well an organization recognizes, predicts and adapts to change can determine whether it thrives, struggles or dies. In the words of the contemporary business guru *Jack Welch*, "Change before you have to!"

There have been a number of recent articles talking about how non-profits, societies and other research organizations such as OIRF will be impacted not only by the current economic climate, but also by technology and demographics.

Demographics will continue to have a profound effect in both Canada and the USA. The "demographic tsunami" of massive numbers of baby boomers entering their senior years (myself among them) is already putting pressure on universal healthcare and government retirement funding. Public policies being put into place in both countries today will have serious consequences for seniors in general, but will also be reflected throughout our healthcare systems.

These factors will influence every active practice – not just the practitioners themselves, but the demographic of patients who will become prevalent in your practice! Today's seniors tend to be more healthy and live longer more fulfilled lives. And thanks to the internet seniors (and all patients in general) are much better informed and insist on being more involved with the choices and decisions regarding their health. The demand for natural and complementary healing methods is increasing exponentially as can be witnessed by the increase of patient oriented ads for supplements and smaller devices. Practitioners can see this trend clearly in the "big business" conferences and shows such as the A4M meetings. At the A4M confer-

ence in Las Vegas last month, I was astounded by the Wal-Mart sized exhibit area and the vast array of so called “complementary” devices, tests and supplements.

As with all things **technology** (from that latest iPhone to our TVs) we are seeing rapid advancements in our field of Biological Medicine that have changed our research protocols and your daily practices in fundamental ways. One of the most obvious technology advances is within the area of homeopathy and remedy administration. In decades past we had practitioners with collections of (tens of) thousands of remedies. Within the past 10 years we have seen a move to having smaller specific test sets, “prescribing” domestically available remedies (like Sanum, Heel, Hevert, Nestmann, etc.) and some limited remedy software. Now, within a few short years, most of us are reliant on remedy software and because of recent legislation in Europe many of the German companies (like Wegamed) are no longer allowed to sell physical test sets and everything is only available in digital format. Already we can see differences in what electronic remedies are available, the quality of the “recorded” remedies and differences in cost factors.

We see another example of these technology changes with the recent splits between companies like BioKat and Med-Tronik (see “The Bridge”, Volume 9, Issue #11, Pages 2-4). Thanks to this split we have already begun to see amazing innovation and access to high quality BioResonance devices from two different perspectives but while still based on the original research and development of the engineer **Erich Rasche** and the physician **Franz Morell**, MD. I fully appreciate that many of you are working with MORA BioResonance devices that have served daily in your practice for decades. As a ‘once in a practice lifetime purchase’, why would you need to upgrade or update your devices? But the other side of that coin is, are you prepared and ready to compensate for the changes and development in the technologically newer models?

As an aside, during the recent A4M conference I was asked by someone why we continue to recommend all the “old” style devices like for example MORA and BioPhotons when other newer – more exciting, more expensive, more whatever – technology is now available. And the answer that spurted out of my mouth before considering the diplomacy of my remarks was “because they work”. And with a bit of further reflection I can add that for most of these “old” style devices we have new models which offer us the most innovative developments in the Biological Medicine field of today.

However, if recognizing and responding to current change as it happens is challenging; predicting the change drivers of the future is even more so. Our practitioners, directors, advisors and staff have been pro-active in analysis, discussions and planning in order to focus the activities and research of OIRF as we move into 2014. I am not going to bore all of you with a list of our plans and projects (those dreaded and often short lived New Year’s Resolutions), but you will shortly begin to see differences as we continue the transformation that will take us forward into a new era for Occidental Institute.

Amidst all this transformation two things have never changed – first, our commitment to our practitioners, and second, the dedication of our practitioners to OIRF. As we enter our **42nd year** we can look back on a record of growth, longevity, legitimacy, and unflinching ethics that few, if any, other associations in this field can match. The powerful united voice of our growing organization will help drive the

changes that will make Biological Medicine a force to be reckoned with for all healthcare choices. Join with us – again – as we re-dedicate ourselves to the expanded application of Biological Medicine in North America.

Although initial plans were in place to turn “The Bridge” newsletter back into a paid subscription, we are once again offering this venerated publication free of charge for 2014. Like last year, all issues will be sent to you by email and then published in PDF (print) format online. **Access is open to all.**

Our publication focus will however be changing. Previous issues have focused on research, studies and bringing you the very latest information. **Prof. Dr. Hartmut Heine's** articles included in last year's issues were a testament to the – dare I say it – “scientific” background and explanations of Biological Medicine. But, as interesting and challenging as it is to follow the leaps of inspiration and understanding taken by these famous (and much honored) researchers, what are we supposed to do with this insight on a daily basis in our practice?

Included in this issue (Volume 10, Issue #1) you will find the first in a series of articles about the methods and devices recommended by OIRF. We will show you the benefits and some of the possible applications of these methods. The emphasis will be on **practical everyday application** – on how you can utilize each particular method in your practice.

But, **we need your support.** Even though we are a non-profit organization we must still pay the staff, the bills and the expenses. If our research, publication and sponsorships in this field are to continue, we need to increase our (up until now minimal) fund raising activities.

We ask for your continued and ongoing financial support as we move forward into 2014:

- 1) Consider making a donation to OIRF for the newsletter (even though we are offering it freely)
- 2) Be sure that you have purchased copies of the many educational printed and electronic publications and the audio/video training presentations available exclusively through OIRF
- 3) Plan now to attend the various smaller instructional seminars and meetings sponsored by OIRF to learn more about these methods
- 4) Incorporate sale of the smaller OIRF recommended devices (such as the Medisend Protect, MECOS, the “Little Ludwigs”, the AQA 707 water regeneration device, and so on) to your patients – talk to Elaine or Carolyn for quantity discount pricing.
- 5) Make this the year you travel to Germany with us to see Medicine Week
- 6) Consider which of the various devices and methods recommended by OIRF will work in **your** practice and make this the year that you add one or more of them into your office
- 7) Plan to attend the various conferences and conventions where OIRF will sponsor an exhibit booth to see these methods in action and talk to us personally about how you can incorporate these methods into your practice

We thank you for your support and look forward to working with each of you during the coming year. To close, I quote a few words to live by for a successful New Year: “A blind man's world is bound by the limits of his touch; an ignorant man's world by the limits of his knowledge; a great man's world by the limit of his vision.” (Rev. E. Paul Hovey).

➡ Reminder: All Volume 10 Issues of "The Bridge" will also be published on our website and are available to download in pdf/print format. Follow this link to download your PDF copy of Issue #1.

➡ **Renewal** to "The Bridge" newsletter for 2014 will again be a free subscription to all interested practitioners. Access is open to all. Those practitioners only viewing this Newsletter online are welcome to provide us with your email address to receive preview Issues directly.

➡ I have already been contacted by several speakers and a clinic who want to speak to the 2014 tour group. Dates for the 48th Medicine Week Congress have been confirmed for Oct. 29 through Nov. 2, and thus dates for our **41st Biological Medicine Tour program to Germany will run Tuesday, Oct. 28 through Monday, Nov. 3, 2014**. Speakers and presentations are being arranged over the next few weeks and we look forward to having you join us! I've given you lots of advance time notice – plan now to join us for this educational (and fun) tour program!

I have written a [Germany Tour Report](#) about all the events and activities from the special 40th Anniversary Tour Program and included some of the many pictures taken during our adventures and travels. It has been posted online and should 'whet your whistle' (so to speak) to join us later this year.

➡ Plans and sponsorship of various seminars and conferences have been altered in light of our transforming format for 2014. The Biological Medicine Symposium 2014 has been cancelled (due to several of date and venue conflicts). Instead we will be sponsoring a number of smaller seminar workshops. Most will be held in Vancouver, BC Canada so that we can make our demonstrator instrumentation easily available without the complicated border and customs issues of repeatedly transporting them into (and back out of) the USA.

These workshops will be sponsored to provide practical training and instruction for application in your practice. Speakers will be experienced practitioners readily able to answer your questions and assist you in specific practice applications. Please watch the [Events page](#) on our website as well as future issues of "The Bridge" for details of dates, speakers and venue.

➡ During these first months of 2014 there have also been changes made to the OIRF Boards of Directors and Advisors. **Roger S. Jaynes**, DC has been appointed as Vice Chairman of the Board of Directors and we extend our thanks to him for accepting this important post. Dr. Jaynes experience and expertise in this field are welcome additions to our respected panel of advisors. Follow this link to see listings – and some pictures – of our current board members.

➡ So, here are your newsletter items for this Issue #1:

*An **exclusive article for Affiliates**, published January 2014

MORA THERAPY

The Central Pillar in the New Medicine of the 21st Century

By Andrea Reupke, MD

From an article in CO'MED, Volume 19, September 2013

**Machine Translation by SYSTRAN, Lernout & Hauspie, LogoMedia & Prompt
Translation & redaction by: Carolyn L. Winsor, OIRF**

© Copyright 2013, Dr. Andrea Reupke, Düsseldorf, Germany

In spite of indisputable advances with the treatment of many illnesses like allergies, rheumatic illnesses, respiratory illnesses, acute and chronic pain or neurological pathologies, school medicine pushes on the boundaries with their focus on medication therapies and surgical interventions. Thus it is urgently necessary to more strongly pursue, as already known, the innovative complementary medical therapy approaches. In the future the [complementary medical approaches] will no longer stand in contrast to classical school medicine, but rather for the purposes of the patients will be an important supplement to the diagnosis and therapy of the most diverse illnesses. It is therefore the duty of our time to bring both perceptions together equally within the scope of a New Medicine of the 21st Century.

MORA Therapy – A Central Pillar

With this new realignment of medicine, biocybernetic* methods like MORA-Therapy will play a central role. The new biocybernetic MORA-Therapy is the further development of conventional BioResonance which was founded by the Engineer *Erich Rasche* and *Franz Morell*, MD more than 35 years ago and was steadily further investigated since that time.

* The use of the term “biocybernetic” is somewhat confusing here. This is an older term still used by the MORA Physicians Society in Germany, to which Dr. Reupke obviously belongs. More commonly used today the term “BioResonance” describes the method in view of current research and understanding. CLWS

Since 1977 the MORA device [models] developed by Rasche and Morell stood in the central point of practical application. In the meantime in close collaboration with scientists and practicing MORA therapists a new device generation – the MORA Nova – was efficiently and practically developed.

Expressed **very** simply, the individual oscillation patterns (frequencies) of a patient or a substance are taken up through an input electrode and delivered electronically modulated (by amplification or attenuation of the frequencies or by inverting them) as a therapy impulse. These therapy impulses can be returned to the patient in combination with built-up [electronically] stored away substance frequencies (e.g., Bach Flowers) through the output electrode.

MORA-Therapy is free of harmful side effects, can be used accompanying for every symptomatology, and can be combined with many therapy procedures. Thus it can support the therapist very well in his goal to treat comprehensively.

Case Study

The following case representation shows an example of the possibilities of MORA-Therapy in practice.

The first contact took place in September 2012. It was a basic test (duration: 100 minutes) and eight treatments (duration from 40 to 45 minutes) carried out in intervals of between seven and nine days.

The patient, born 1979, was pregnant in the fourth week. As a main wish she expressed “to finally be able to breathe freely again” and to get lasting help for the resolution of chronic back pain and headaches which regularly developed into migraine-like attacks. Additionally partial skin symptoms happen on the face. Pimples and efflorescence appear in the cheek area as well as around the eyes. This represented a great psychic burden for the young woman.

Also, she could no longer consume fresh fruit or vegetables, because this led immediately to diarrhea and hypoglycemic symptoms. In the meantime a recognizable fear had already manifested itself in her eating behavior. However it became clear in the anamnesis that the chronic sinus problems and the respiratory difficulties linked with it, especially at night, explained the longest existing and the most fundamentally burdened symptom. On an arbitrary scale of 1-10 (1 = no problem, 10 = maximum burden) the intensity was evaluated by a permanent 9. The patient was normal weight, non-smoker and seldom consumed alcohol. The physical examination established no particular features. The last gynecological examination results showed no pathologies.

From the allergological point of view a basic RAST-test was submitted which showed particular features for nuts and different spices as well as a “possible intolerance” of fructose. The patient could not identify herself with it. A period of restriction for these foods showed no significant effect. In the past the patient was repeatedly in osteopathic treatment of the head, back and pelvis. This was felt as very pleasant, nevertheless the complaints increased again after six to eight weeks.

Her food and eating behavior was declared as “normal”. And moreover to be mentioned is that besides pork and also refined sugar, iodized food salt, emulsified fat, white flour, ultra-highly heated homogenized and pasteurized milk products as well as daily use of a microwave was considered as “normal”. These habits were changed during the eight week treatment time with lasting effect.

Fig. 1: Diagnosis with the MORA-Nova device: The patient is tested for possible intolerances.

Diagnosics

Bioenergetic testing by means of EAV established a priority disturbance (indicator drop) in the Lymph and Spleen/Pancreas system.

These systems were associated with the Water Element (taste: salty) and the Earth Element (taste: sweet). Interestingly the patient declared a great craving for “salty” in the early evening. However the “sweet” was almost a compulsion for her after each bigger food intake.

An increased (EAV) measurement value also appeared in the Liver System (Wood Element) and Large Intestine (Metal Element) as well as Allergy (Water Element) and connective tissue (Metal Element). For the liver measurement point a clear improvement with the Toxoplasmosis nosode D200 could be developed. The frequent waking phases

between 1-3 o'clock in the night (Liver time) and the migraine-like half-sided headache attacks (the course of the Gall Bladder Meridian) are classified anamnesticly to the "picture" of an energetically disturbed Wood Element.

The measurement value of the Large Intestine Meridian end point with its direct connection to the nose and the mucous membranes is nearly to be expected as already an expression of the symptomatic events.

Furthermore, a burden was tested for this system through Cladosporium and household dust (brought from home) and treated.

Priorities

The Spleen/Pancreas Meridian as a representative of the Earth Element "suffered" from a strong geopathic burden from a fault with an additional gravitational anomaly (Benker grid) in the area of the sleeping place. By means of a continuing capacitive coupling with the heating system the radiation was distributed in the whole house and was additionally amplified.

Here MORA-Therapy was coupled with a Baubiology renovation.

The Lymph System was probably burdened for decades by the incompatibility from lard and yeast. Distributed over several appointments only transmission to the patient of the combination of both substances simultaneously from the ELH Module (**EL**ectronic **H**omeopathy) and the 180 degree phase shift derived from it (inversion), led to lasting stable measurement values.

Therapy Success

The treatment was completed in the middle of November 2012. The patient declared a subjective massively improved attitude to life (individual scale: 1-2). The chronic sinus problem had actually disappeared and the respiration functioned unhindered, also at night. The skin symptoms had disappeared up to the smallest little points on the left cheek. The patient tried to avoid pork and lard to the present day. In the meantime, yeast containing cakes and pastries and drinks, fruit and raw vegetables were again tolerated without problems. The pregnancy and birth proceeded normally and the child is healthy and appropriately developed for its age.

Outlook

In the past decades MORA-Therapy very much has a stimulating effect on the everyday practice life on the basis of its concepts, questions, studies and success. Our own practice experiences confirm over and over again that it can and should take on a central role in the New Medicine of the 21st Century because it makes it possible to connect the [scientific] knowledge of School Medicine with the empirical knowledge systems of the old European and Asian health teachings and at the same time still integrate the scientific models of quantum mechanics and biophysics.

Dr. Reupke is a practicing specialist in Düsseldorf. Her main treatment focuses are: Dermatology, regulative medicine, immunology, energy medicine. Her integral base in diagnosis and therapy follows the **GES System** [*Gesundheit, Energie, Schönheit*] – Health, Energy, Beauty – which combines medicine (body), psychology (soul) and aesthetics (aura). School medicine and biocybernetic methods are used.

Director's Note: There is a long list of training and educational materials including books, reports, manuals, videos and DVD's available through OIRF concerning BioResonance Therapy, MORA Therapy, EAV testing, Vega Testing and homeopathy. Private training sessions can be arranged with each of the OIRF Board of Medical Advisors, and OIRF also sponsors and participates in seminars, conferences and workshops on all of these topics. Contact OIRF offices for further details and information or visit our website at www.oirf.com/resources.html.

Innovation

In Diagnostics and Therapy

MORA®-Nova

State-of-the-Art BioResonance Therapy

MORA®-Nova offers everything you need for easy and effective application in your practice: more than 35 years of experience in the proven MORA® BioResonance method, new design, ease of operation, enhanced therapy and diagnostic options and last but not least, State of the Art technology in development.

MORA[®]-Nova

MORA[®]-Nova Technical Advantages:

- Integrated colors, i.e. for pain and color therapy
- Patented 2-channel technology – reduction of therapy time owing to synchronized treatment of body segments or simultaneous treatment of acute and chronic conditions for example.
- Full network integration – Microsoft Windows Networks or Peer-2-Peer; maintenance-free data server which also works via a portable drive.
- Easy installation – set-up on all Windows PCs from Windows 2000
- Portable with lockable touch-screen – for high mobility and flexibility
- Online updates

MORA[®]-Nova Advantages:

- 500 indication based therapies
- 19 Universal-therapy programs for quick access
- 4 easy time-saving diagnosis techniques
- Safe, quick and easily delegable operation
- Nova Professional – the complete Diagnostic and Therapy device
- Nova Basic – the newcomer device for half the price
- Additional packages for the medical regulation concept according to Dr. med. Gottfried Cornelissen

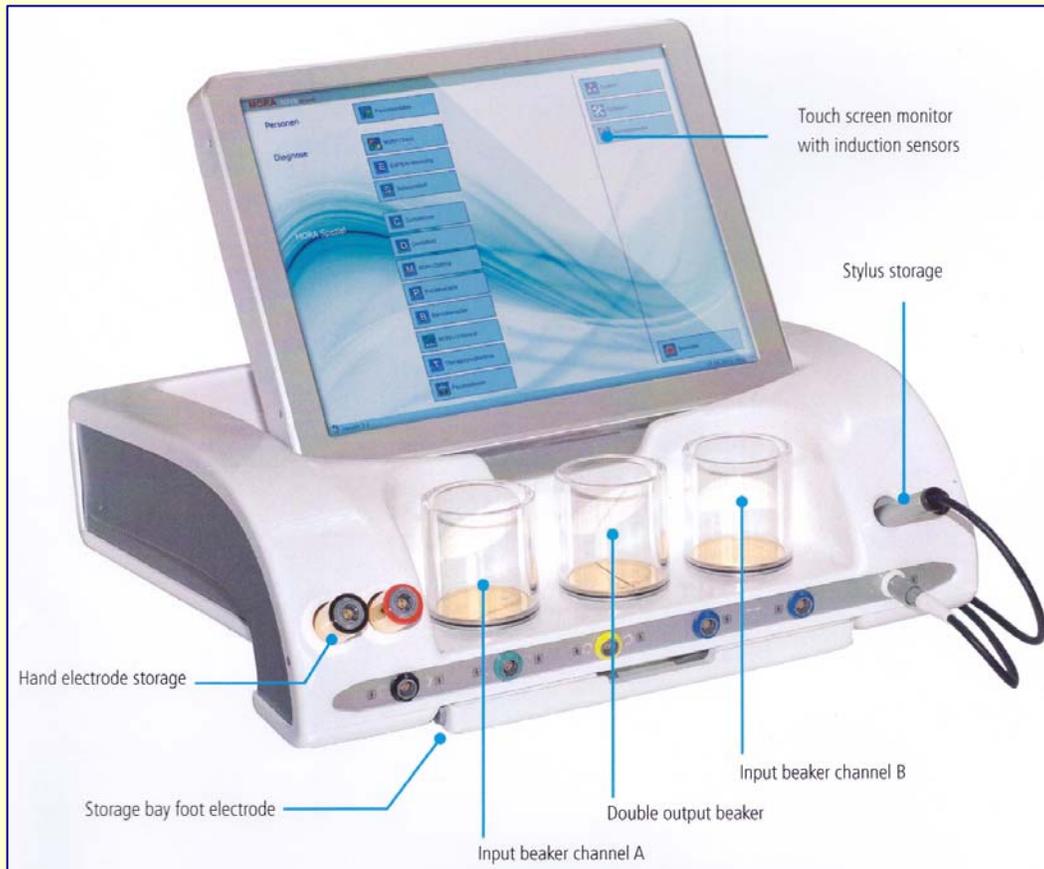

MORA[®]-Nova Features:

- User interface/main menu – A very friendly and convenient touch screen interface
- MORA[®]-Check – Here you have the option to measure the body segments: head, hands and feet, for an overview of the body's state. Automatic assignment of electrodes.
- Biorhythm – A very special individualized basic therapy. By entering the date of birth, the parameters are individualized on the person, thus achieving a particularly effective therapy.
- MORA[®]-Universal - MORA[®]-Nova Universal contains 25 preset, indication related therapy programs with several therapy steps. Ideal for newcomers. Possibility to individualize the therapies further with the patient's own secretions/excretions.

Convince yourself of the original!

MORA[®]-Nova

State-of-the-Art BioResonance Therapy

Technical Data:

- 2 channels and with significant technical improvements
- Extension of frequency range: 0.1 Hz to 1 MHz (so far 80 kHz)
- Extension of Filter setting range: 0.1 Hz to 250 kHz (previously up to 180 kHz)
- Amplification: 0.1 to 1 Million per channel and mode (previously up to 100 per channel depending on mode)
- Integrated PC
- Therapy programs: Up to 16 therapy steps programmable (previously only 4)
- Optional automatic Segment measurement: 4 or 6 segments
- Automatic detection Hypo/Hyper
- Integrated MORA[®]-Mouse, beaker
- Touch-screen: Illustration of measurement points
- Measuring Stylus: New stylus with extended functions. Possible forward and backward movement by means of the stylus button
- Active UV Electrode: Magnetic electrodes, 4 inputs, 4 outputs, 1 UV LED output, allows for excellent pain therapy especially in conjunction with color therapy
- Spin Tester: The spin tester allows for testing of geopathic stress.

List of Electronic Test Sets for Therapy with the MORA® -Nova

Test Sets – All test sets together comprise approximately 20,000 single substances	Test Set Groups – Contain single test sets selected for the user at special pricing conditions
<ul style="list-style-type: none"> • 5-Elements 	NOVA-Elements Group
<ul style="list-style-type: none"> • Allergy • Alzheimers & Dementia (Cornelissen) • Bach flowers • Biological catalysts • Chemical elements • Degeneration & Mitochondropathy (Cornelissen) • Dental • Geopathy • Labo Life • Meridian test set (Morell) • Mycosis 	<ul style="list-style-type: none"> • 5-Elements • Allergy • Bach flowers • Chemical elements • Geopathy • Mycosis
<ul style="list-style-type: none"> • Nosodes • Orthica – Orthomolecular substances • Sanum • Schüssler Salts • System test set (Cornelissen) 	Homeo-Group
<ul style="list-style-type: none"> • Heel • Wala 	<ul style="list-style-type: none"> • Heel • Wala • Vitortho
<ul style="list-style-type: none"> • Horvi – snake serum and enzymes • Pascoe – homeopathic substances • Pekana • Vitortho – Orthomolecular substances • Inus – Orthomolecular substances • MJS – Orthomolecular substances • Color test set 	<ul style="list-style-type: none"> • Horvi • Inus • Vitortho • Cornelissen • System diagnostics • Degeneration & Mitochondropathy • Alzheimers & Dementia
	AllerHomeo-Group
	<ul style="list-style-type: none"> • Allergy • Wala

Innovation In Diagnostics and Therapy

Order your MORA® -Nova with the newly developed Cornelissen module now!
After intensive work, the module according to Dr. Cornelissen, an internationally recognized complementary medicine physician, has been completed.

MORA® -Nova Basic

The "entry-level" unit at half price (upgradeable to MORA® -Nova Professional)

MORA® -Nova Professional

The Complete diagnostic and treatment device. Include the optional package with the medical regulation concepts according to Dr.med. Gottfried Cornelissen.

CONTACT for order, delivery and pricing information:

Website: www.oirf.com Email: support@oirf.com

➡ Follow this link to our website to see Issue #1 in print/PDF format.

➡ **Conferences and Conventions:** Please watch for announcements of the speakers, venues and details of these exciting OIRF activities and events for the year 2014:

➤ **NorthWest Naturopathic Physicians Conference**, Vancouver, BC, Canada, April 25-27, 2014: OIRF will host an exhibit/demonstration booth. Follow this link for details <http://www.nwnpc.com/>

➤ **Med-Tronik BioResonance Distributors' Meeting**, Friesenheim, Germany, April 25-27, 2014: OIRF will be represented by Carolyn Winsor-Sturm at this important meeting.

➤ **Biological Medicine Tour #41 to Germany**, October 28-November 3, 2014 (dates for the 48th Baden-Baden Medicine Week Congress have been confirmed). Join us for our **41st** group tour including the world famous "Medicine Week" Congress in Baden-Baden. Tour program also includes private OIRF English language lectures from renowned German clinicians and researchers as well as pharmacy and clinic visits.

➤ Watch for speaker, venue and date details for a series of seminar/workshops focused on practical application of OIRF recommended diagnostic and therapy methods.

➡ **Updates, Reminders and Announcements:**

➤ **MORA Nova** devices were featured at the recent **47th Medicine Week Congress** in Baden-Baden, Germany. These proven devices are available for immediate delivery and the professional level model provides immediate "out-of-the-box" therapy applications while you take the time to familiarize yourself with the many possibilities of BioResonance Therapy. Contact Elaine or Carolyn for ordering details.

➤ Descriptive and pricing information for the "**M 3**" and "**M 5**" BioResonance devices from **BioKat GmbH** will be available shortly. Contact Elaine or Carolyn for advance details.

➤ For those of you who missed that great **MORA Nova training seminar/workshop in St. Louis, MO in June 2013**, high quality professional video recordings of some of the sessions are now available. The guest instructor was **Nuno Ruivo, DO** from Med-Tronik, Germany who is a long time MORA user and one of the technology and software developers of the Nova device. Order the 5 DVDs for \$100 and then deduct it from your MORA Nova order.

➤ I took nearly 400 pictures during the Biological Medicine Tour #40 through Germany and Switzerland. I have picked out some of the best photo memories to include in my annual [Germany Tour Report](#). Follow that link to join us from at home to follow our adventures and activities. Dates for next year's Tour #41 have been confirmed for October 28 through November 3, 2014 (Medicine Week Congress dates have also been confirmed).

➤ Watch for Volume 10, Issue #2 of the "The Bridge" newsletter to arrive in your Inbox around mid-February. That issue will feature an article from OIRF Medical Advisor **Simon Yu, MD**.

➤ **Updates, Reminders and Announcements** (Continued):

- Visit our **Facebook** page – will you be our friend?
- For a complete [listing of resource materials](#), including publications, reports, books and videos please follow this link to our website. There are full descriptions of all printed and recorded materials online.
- For a complete [listing of recommended instrumentation](#), including diagnostic, therapeutic and BioResonance devices please follow this link to our website. There are full descriptions of all instrumentation online.

I trust you have found much of interest in these pages. We look forward to meeting you during our 2014 activities and programs. As always your comments are welcome. Remember that this is your newsletter – your suggestions, article contributions, critiques, FAQ's and compliments – are gratefully accepted.

Yours in health,

Carolyn
